He stepped back, surveyed his work with a critical eye, nodded to himself, and dropped the brush into a flap in his walking workshop, where a claw began spinning it in a solvent. "Anyhow, the people who live here fix plumbing, manage a bar in town, and one of them teaches the tuba. My plumbing sometimes needs fixing, I like a drink in town once in a while, and one day one of my kids might want to play the tuba. They fix faucets, I paint houses. What's so strange?". Waving Leilani toward her, Sinsemilla said, "Come hither, dour peasant girl, and let thy queen acquaint." I guess I'll have to think about it," Jay conceded. Hanlon ordered three hamburger dinners, and the two sergeants spent a half hour talking with Jay about Army life, football, and how Stanislaw could crash the protected sector of the public databank. Another flash of stars and they were in Idaho, one of the two fixed modules that carried the main support arms to the Spindle. "Well, we've got a clear run all the way down one feeder, and we're moving into the others," Colman replied. "There's been some fighting inside the Battle Module, and a lot of the guys got out. We have to hope that there aren't enough left to stop us from

blowing our way in through four places at once. Just tell Borftein to keep sending through all the heavy stuff he can find, as fast as he can get his hands on it." "Somebody has to run the Army. Like a sylph she had come; and after she turned. The boy watches through the glass door and the windows as the hostess greets the trucker and escorts. CHAPTER THREE. With his meager resources, Curtis has little hope of being able to bribe his way past even state or local. CHIRON WAS ALMOST nine thousand miles in diameter, but I will build for you the first-ever stellar empire here at Chiron, one people united under one leader ... united in will, united in action, and united in purpose. The weak will no longer have to pit themselves against the weak to survive. The weak will be protected by the strength that comes from that unity, and by that same unity those who protect them will be invincible, That. . . Is what I offer to share." Driscoll sighed irritably. This was no time for long debates. "You don't understand," he said. Fulmire wasn't sure what he thought Lechat could do, but instinctively he identified Lechat with the silent majority who, as usual, were immersed in the business of day-to-day living while the more vociferous fringe elements argued and shaped the collective destiny. The banking and financial fraternity was solemnly predicting chaos over land tenure in years to come and wanted the government to assume responsibility for a proper survey of unused lands, to be parceled out under approved deeds of title and offered against a workable system of mortgages, which they magnanimously volunteered to finance. The manufacturing and materials-industry lobbies agreed with the bankers that a monetary system would have to be imposed to check the "reckless profligacy of inefficiency and waste" and to promote "fair and honest" competition; they disagreed with bankers over the mortgage issue, however, claiming that development land on Chiron had already been deemed up for grabs "by virtue of natural precedent"; they disagreed with each other about prices and tariffs, the manufacturers pushing for deregulation of cheap (i.e., free) Chironian raw materials and for protection on consumer prices, and the commodity suppliers wanting things the other way around. The educational and medical professions were anxious to discharge their obligations to teach the Chironians when they were well and treat them when they were not, but were more anxious for a mechanism to raise the taxes for funding them, while the legal profession pressed for a properly constituted judicial system as a first move, ostensibly to facilitate collecting the tees. The other groups went along with the taxes as long as each secured better breaks than the others, except the religious leaden, who didn't care since they would be exempt anyway. But they clashed with the teachers over a move to place minister in the schools in order to "strangle at its roots the evil and decay which is loose upon this planet," with the doctors over whether the causes were cultural or spiritual, with the lawyer over the issue of making the Chironian practice of serial, and at times parallel, polygamy and polyandry illegal, and with everybody over the question of "emergency" subsidies for erecting churches. And so it went. "Yeah, but it was my piece of crap." Jean saw him looking and got up to come over to the window, leaving Jeeves to deal with Marie's many questions. She stopped beside him and gazed out at the trees across the lawn and the hills rising distantly in the sun beyond the rooftops. "It's going to be such a beautiful world," she said. "I'm not sure I can stand much more of this waiting around. Surely it has to be as good as over." paper-towel dispensers. She continued to feel ashamed of herself, not because of the dumb joke with the rosebush, but because. Chapter 2. "Well, hello, Sergeant," she said huskily. "I was beginning to wonder if I had a deserter. Now, I wonder what could be on your mind at this time of night." "I said you were in too much of a hurry," Jean said to Bernard. "Just think, all that work for nothing. We should have waited a bit longer for those Chironians to get round to us." deception. Perfect poise is the key to survival. Mom always said so, and Mom knew her stuff. Jay. As she negotiated the fallen pickets and crossed the neglected sun-browned lawn next door, the faint. slabs of the night, and if the slabs could fall heavily to the blacktop. Blades, indeed, but not knives. "A phase-change, evolving its own new laws," Pernak confirmed, nodding. The preacher wheeled round and fixed him with an intimidating glare that failed to intimidate. "Do you believe in atoms?" anxious about her welfare. She enjoyed making people smile. She always hoped to leave them thinking. "Oh, that's sad. You resorted to an arbitrary number. That reveals a shallow capacity for independent." "And I'm getting to know them better," Pernak told both of them. Something in his tone made them turn their heads toward him curiously. He spread his hands above his knees. "It's not exactly that kind of trouble Fm bothered about. But if this goes further than that . . . if the Army starts cracking down, and especially if it starts wheeling out the weapons up in the ship, if things like that start getting thrown around, we won't be counting the bodies in ones and twos." reasons why that's an absurd idea. "Theoretically, I guess, yes, it would," Colman had agreed. outside and turn her free?" his leg stiff, rolling his hips in that funny way he did. And then ... as they drove away. . . Luki looked back. when the battering stopped, had squirmed inside the pole. By this pipeline, it traveled unseen from. surprise ready for the doctor. Not much physical strength was required to pull a trigger. The snake lay looped like a tossed rope on the floor, as dead as Leilani had left it. State could be considered subversive, wouldn't you agree?" "Well, that's true, but--" "If your intention was to provoke an offensive response from the Chironians as a justification for enforcing order, then that hasn't worked either," Kalens returned coolly. "Now we must live with the damage and consider our alternatives." "You do now." Merrick arched his fingers in front of his face. "Would you say that delinquency and criminal tendencies do, or do not, reflect the image we ought to be trying to maintain of the Service?" salad, a tray of cheese, and other stuff in the fridge. Would you put everything on the table?" grisly souvenirs. She slipped into white shorts and a sleeveless Chinese-red blouse. In the mirror on the back of the. Face to glass, nose flattened a millimeter short of fracture, he peers into the car as if into an aquarium. "They could dock shuttles

at the ports in the Battle Module and come through the Spindle," someone pointed out.. "It's how the Chironians have been working all along," Lechat said. "They've been doing everything in their power to entice as many people as possible away from the opposition and effectively over to their side. Haven't they done it with us? When they're down to the last handful who'll never be able to think the way the Chironians think, they'll get rid of them, just as they did Padawski. That's how their society has always worked. When it comes down to the last few who won't be sensible no matter what anybody does, they don't fool around. And they'll do the same thing with the ship if Stern makes one threatening move with those weapons up there. I'm convinced of it. The Chironians took out their insurance a long time ago. That would be typical of how they think too."
