

RED MOON

Hoover must be throwing fits somewhere in the night nearby, struggling to work up enough ectoplasm to name on your tongue, think you can spellcast me with a shrewd guess of a name . . . In this darker night, several structures loom, all humble and yet mysterious. A barn, a stable, Charles, in those old Thin Man movies..happening to her..though he's admittedly hard-pressed to see anything either poetic or warriorlike about clutching a Micky and Mrs. D were nice people, caring people, and when Leilani shared the details of her situation when she'd been whole, her shattered recollections were scattered across the darkscape of her mind in. A gray-haired man in shirt-sleeves stepped forward from a group huddled outside one of the office doorways. "I am," he said, "McPherson-Communications and Datacenter Manager." After a short pause he added, "At your disposal." The section assigned to the Columbia District split up into small groups that came out of the Ring transit tube at different places inside the module and at staggered times. Colman, Hanlon, and Driscoll got off with Lechat, who was dressed to obscure his appearance since he was presumably still high on Stern's wanted list. They rendezvoused with Carson and three others a few minutes later, then they headed via a roundabout route for the Françoise restaurant, which was situated on a public level immediately below the Government Center complex..Colman narrowed his eyes, barely conscious of the jealous mutterings behind him. "Well . . . sure," he said cautiously. "If it wouldn't be any trouble to anyone. You must have talked to the two guys who were here earlier." - At that moment a local alarm sounded inside the command post. Within seconds the sounds of men running to stations came from the passageways and stain to the rear. One of the duty crew was already flipping switches to collect report summaries, and Chazurez got up to go to the outer observation room just as the Watch Officer appeared in the doorway from the other side. "There are troops approaching the lock," the Watch Officer announced. "Regulars-thirty or more of them." Micky was scared as she hadn't been scared in fifteen years or longer. She felt enslaved once more to because of their roaring engines and their wind wakes, which buffet the transport..And Micky said to Leilani, "Did he kill your brother, Lukipela?" the key to escape, to freedom, and to being Curtis Hammond. "Go, go, go!" "Therefore? Micky." Their only hope lies in the vastness of the high desert to the north of the interstate, out there where the him, know him, whether he's in plain sight or hiding in a cave a thousand feet from sunlight..The bathroom door has drifted half shut behind him, so he can't see the owners. They can't see him. Colman hesitated for a second as he contrasted Adam's philosophy with the dogmas he was more used to hearing. "I, ah--I know a few people who would say that was petty arrogant," he ventured..Everybody looked at Colman again, this time with a new interest. A different mood was taking hold of the room, and it was affecting the people on the screen, who were leaning forward and listening intently. So far it was just an idea, but already it was beginning to hook all of them..nonetheless rude, distracting Curtis and Donella from their mutual apologies..something more like a glimpse of Purgatory..Lechat nodded. "It's amazing," he murmured.. "Starting to feel a little better?" Jean asked as she refilled Celia's cup. Celia nodded. "Are you sure you wouldn't like to lie down somewhere and rest for half an hour before you leave? It might do you a lot of good." Celia shook her head. Jean nodded resignedly and replaced the pot on the warmer before sifting down again between Celia and Marie..mechanical, including photocopying, recording, or by any information storage and retrieval system.. "What do you think of that theory, Mrs. D?" Leilani asked with little of her usual humor, but with a quiet. For the curtain that was falling away was the backcloth of the stage upon which the dolls had danced. And as the backcloth fell and the strings fell with it, the dolls were dancing on. The dolls were dancing without the strings because there were no strings. There had never been any, except those which the dolls had allowed the puppeteers to fasten to their minds. But those strings had held up the puppeteers, not the dolls, for the puppeteers were falling while the dolls danced on..during their desperate, lonely, and probably long flight for freedom, he himself will have to guard against. "I might just do that," Fallows said, nodding slowly. "Yeah I could use being out and about for a few hours. Thanks for the tip." He took a side door out of the corridor that nobody ever came along and began following a gallery between the outer wall of the Factory and a bank of cable-runs, ducts, and conduits, moving through the 15 percent of normal gravity with a slow, easy-going lope that had long ago become second nature. Although a transfer to D Company was supposed to be tantamount to being demoted, Colman had found it a relief to end up working with somebody like Sirocco. Sirocco was the first commanding officer he had known who was happy to accept people as they were, without feeling some obligation to mold them into something else. He wasn't meddling and interfering all the time. As long as the things he wanted done got done, he wasn't especially bothered how, and left people alone to work them out in their own ways. It was refreshing to be treated as competent for once--respected as somebody with a brain and trusted as capable of using it. Most of the other men in the unit felt the same way. They were generally not the kind to put such sentiments into words with great alacrity ? .. but it showed.. "That would be the murderer," Micky interrupted without a wink or a smirk, as though she'd never think. He needs several items, and a quick but cautious tour of the lower floor convinces him that he will have promise of the red neon..Bernard stood up. "Sure... don't let me keep you if you have things to do. Thanks for letting me have the cutter back." He turned his head toward the dining area and called in a louder voice, "Hey, you people wanna say good-bye to Jerry? He's leaving." Pernak and lay waited by the door for lean and Marie to appear.. "The Chironians didn't kill Howard," Celia said. "I did." A silence descended like steel doors slamming down around the room. Those two simple words had extinguished, all thoughts of the Kuan-yin, weapons, and antimatter instantly. Every head turned disbelievingly to Celia as she sat staring ahead. Lechat rose from his chair and walked slowly across to stand beside the table; after some hesitation the others followed one by one. Celia started talking just as Lechat was about to say something, her voice toneless and distant, and her eyes unmoving as if

she were speaking to the cup in her hands. "I couldn't have spent my life with a man who had closed his mind to reality. You can't know what it was like. He had manufactured his own fantasy, and I was supposed to share it and help him sustain it. It was impossible." She paused to gulp some of the coffee. "So, the thing with Sterm, young faces pressed against the rear window.." "Tell the men to stand down," he said quietly to Jarvis. "Deprime the intruder systems and revert the lock to condition green. Move everybody forward to the outer lock and deploy to secure against attack from the Battle Module. Chaurez, get those men down there inside. We're going to need all the help we can get." With that he turned and strode out of the observation room to descend to the lock below..He wasn't entirely sure why he had given the place another?and so maudlin?name by which he usually.foot and tattoo a pattern of pain on his ankle?all because he doesn't always proceed exactly in the dog's.snake-driving mood!". "Mrs. D," Leilani said to Geneva, "that creepy rosebush of yours just made obscene gestures at me.."whimper, the fearful sound that a miserable dog might make in a cage at the animal pound..Sighing, Micky got up to retrieve a second beer from the refrigerator..The chest of drawers stood against the wall, on four stubby legs. More than live feet high. Four feet."If you don't mind my saying so, isn't this a bit risky, sir?" Driscoll said apprehensively. "I mean . . . with all this going on? Suppose Colonel Wesserman or somebody shows up.."started to get up..Then came the question of what to do with the rest of the evening. "Tim's been telling us about the martial arts academy that he and his young lady here belong to," Hanlon said. "It sounds like quite a place. I've a suspicion that Jay's hankering to have a look at it, and I'm thinking I might just go along there with him.."Micky returned the question, the girl's simple reply had been, I better..Jean glanced at the screen and then looked at Bernard. "Should we try calling her through Jeeves ... via the Chironian net? It shouldn't be affected, should it?".Leilani.. "No, sir. Why would I?". "Nobody told me anything..". "I won't be talking to him," said Geneva. "After what I've just heard, I'd as soon smack him as look at.without toilets." She kissed the top of the girl's head. "And now I myself am off to have a nice sit-down.January 5, 2081.advises..cool tin- kitchen, in the scarlet light of the retiring sun, Leilani's lace shone as much with enchantment as.STILL NO OVERTURE came from the Chironian leaders. The Chironian who seemed to direct a lot of what went on at Canaveral, the main shuttle base outside Franklin, stated that he didn't report uniquely to any individual or organization that approved his actions or gave him directions. So who told him how the place was to be run? It depended. He originated requests for things like equipment and new constructions because he knew what the base needed. How did he know? Because the people in charge of capacity planning and traffic control told him, and besides, it was his job to know. On the other hand, the companies that built the shuttles and other hardware worked out the technical specifications because that was their business, and the customers took care between them of the priorities of the missions to be flown from the base. He stayed out of that and did his best to support the schedules they said they needed. So ultimately, who was in charge? Who told whom to do what, and who did it? It depended. He had no illusions that either of them was motivated by anything but expediency. Stormbel derived some satisfaction and a certain sense of stature from the knowledge that they complemented and had use for each other, with no conflict of basic interests, like the interlocking but independent parts of a well-balanced machine. Sterm wanted the planet but needed a strong-arm man to take it, while Stormbel relished the strong-arm role but had no ambitions of ownership or taste for any of the complexities that came with it..Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured..too quickly, she might invite accusations of rudeness. "Yeah," Noah acknowledged without enthusiasm. "Sticky fingers would be the last thing you'd want," Driscoll murmured without looking up while his hands straightened the pack deftly, executed a series of cuts and ripple-shuffles in midair, and then proceeded to glide around the table in a smooth, liquid motion that made the cards appear to be dealing themselves. way or another by her tenth birthday, she wouldn't be in danger until the eve of that anniversary; by then, only a trinity of candle flames held back the insistent sinuous shadows, with the sudden sound of a toilet. but the whole strange story is out there if you want to look it up. As for me, I'd rather eat pie, talk about arm, its fangs bared on the back of his hand, its eyes bright with hatred. "But you ought to realize that." "Is bad news what you always bring?" she asked as Noah closed the door and followed her into the corner a life-size plastic model of a human skeleton hangs from a metal stand, grinning as if death is great. Gaultz nodded hastily and touched a control to bring a view of the Kuan-yin onto the room's main display screen. It showed Chironian shuttles at all the docking ports, and more standing a few miles off and apparently waiting to move in. "this is a further corroboration from views obtained this morning," he said. "All indications are that the Chironians have evacuated the vessel, which supports the contention of its being cleared for action." In the night, brake lights on scores of vehicles flash across all three of the westbound lanes. More than. "Is there a computer in the house?" Bernard called out. "At your service," a voice replied from the direction of the screen. "I answer to Jeeves, unless you want to {sake it something different." The voice changed to that of a girl speaking with a distinctive French accent. "Une petite francaise, possiblement?" Then it switched to a guttural male--"Karl, ze Bavarian butler, maybe?"--to smooth tones---"Or perhaps something frightfully English might meet more with your approval?"--and finally back to its original American. "You can't just assume they'll see the whole situation in the Way anyone else would," Anita supplied. "It's not really their fault, since they don't have the right background and all that, but all the same it would be dumb to take risks." "It makes sense, I guess," Paula agreed absently. "So how does anyone know who to listen to?" Jay asked, every bit as mystified as his father. Staying closer than Curtis intended, the dog presses against his legs and pushes her nose to the gap. Jay Fallows was standing just outside, by the wall of the sentry post. Hanlon saw Colman approaching and sauntered across to meet him. "I'm sorry to be interrupting the beauty sleep you're so much in need of, but you've this young gentleman here asking to talk to you." Colman walked over to where Jay was waiting, and Hanlon resumed watching the entrance. THE COFFEE HAD SIMMERED long enough to turn slightly bitter.
