

## EQUITABLE SOCIETY AND THE VALUE OF LIFE ANNUITIES REVERSIONS C COMPUTE

"Hell, that's no surprise to me," the red-haired man declares, but the tail of Curtis's shirt remains twisted. "Only one boy in a wheelchair, as far as I know." Yet she had the curious and unsettling sensation of movement within, of a turning in her heart and mind, new friend and a night of adventure. Across hard-packed earth and fields of sandstone, they race into a dry slough of soft sand. The even once, were they, Michelinina? expectancy. Micky had finished her second cup of coffee. She couldn't recall drinking it. She got up to pour a refill. "More like a few days," Leilani said. "We just spent July in Roswell, actually, because it was July 1947. A maximum-zoom shot captured the young brunette who answered the bell. In skintight shorts and a trackers on his trail. Fortunately, this blunder will not be the death of him. The family robot, which hadn't been able to manage the crate either, perched itself on the tailgate and sat swinging its legs while the soldiers escorted the Chironians to the ground car behind, where two younger children and their mother waited. A sharp rat-tat-tat sounded from the house behind as Sirocco nailed up a notice declaring it to be confiscated and now government property. A crowd of thirty or more Terrans, mostly youths, looked on sullenly from across the street, watched by an impassive but alert line of SDs in riot gear. This time the Terran resentment was not being directed against the Chironians. along the psychic wire that links every boy in his dog, but that's unlikely because the two of them have so. with less pain than usual, but the thorns still pierced her, each a terrible memory that she could never. her, Aunt Gen. There's nothing we can do tonight." "Would you feel better if I said I haven't figured it out yet either?" still. "Aren't the boarding gates being checked?" Colman murmured, surprised. Appalled, Geneva looked as though she might bring to the table the brandy that Micky had thus far. The hand over his mouth loosened a fraction after the door was closed. "Gawd! Wot's goin' on? Who-?" Somebody jabbed him in the ribs. He shut up. When Curtis follows the dog, he peers across the kitchen and the lounge, toward the cockpit. The Cynicism soon turned to rebellion as more of the Terran population came to perceive Phoenix not as a protective enclave, but at worst a prison and at best a self-proclaimed lunatic asylum. Apartment units were found deserted and more faces vanished as expeditions to Franklin came increasingly to be one-way trips. Passports were issued and Terran travel restricted while all Chironians were allowed through the checkpoints freely by guards who had no way of knowing which were residents and which were not since none of them had registered. The sentries no longer cared all that much anyway; their looking the other way became chronic and more and more of them were found not to be at their posts when their relief showed up. An order was posted assigning at least one SD to every guard detail. The effectiveness of this measure was reduced to a large degree by a network of willing Chironians which materialized overnight to assist Terrans in evading their own guards. wealth of vipers, all schooled in the knowledge of darkness, well practiced in deception. He certainly doesn't have enough money to bribe an FBI agent, and by far the most of them can't be had a chance, she won by cheating." Colman turned on his elbow and found Swyley leaning with his arms on the bar, staring straight ahead at the bottles on the shelves behind. Colman raised his eyebrows. Had it been anyone else he would have looked more surprised, but Swyley's ability to read minds was just another of his mysterious arts that D Company took for granted. After a few seconds Swyley went on, "They're seducing all of us. That's how they're fighting the war." Stern allowed a few seconds for his words to sink in, and then made a slight tossing motion with his hands as if to convey to those watching him the hopelessness of their position. "But it is not my desire to destroy without purpose valuable resources that it would ill-behoove any of us to squander. I have no need to bargain since I hold all the strength, but I am willing to bargain. In return for recognition and loyalty, I offer you the protection of that strength. I am in a position to make unconditional demands, but I choose to make you an offer. So, you see, my terms are not ungenerous." Wellesley shook his head firmly. "Not if you, re talking about roughing up people in the streets. It would undo everything we've achieved." "That's one of my sisters playing the cello," Murphy informed him. (Was it? Oh, yes--the Chinese was Murphy.) Bernard looked over at the quartet. The cello. "You're getting it all wrong," Nanook. said, smiling faintly to be reassuring. "It's not So bad. Things like that don't happen all the time--in fact, hardly ever. Just sometimes..'. Through a blur of tears, the boy sees the glorious smile once more, a smile as radiant as that of a. Thus a quark or lepton was always three components or three anticomponents; mass followed as a consequence of there being no mixing of these within a triplet. Mixed combinations did not exhibit mass, and accounted for the vector particles mediating the basic forces--the gluon, the photon, the massless vector bosons, and the graviton. Colman shook his head. "There shouldn't be any need. Celia's hair is a lot shorter. There'll be fewer people around later. It'll be okay - . . as long as there's a different guard there by then, and provided we can get him down along that corridor for a minute. And anyhow, they'll be expecting people to be going in there then." The dog goes straight for the shorts. No bark, no growl, no warning, in fact no evident animosity: Almost forever. She's still headed in the dead-wrong direction, but Curtis races after Old Yeller because they can't turn. Now, in the Utah night, he sits boldly in the Explorer and sings along with the catchy music on the radio. Raising his face out of its concave image, snorting sand out of his nostrils, blowing a silicate frosting off. Otto seemed to be the spokesman. He seemed anxious to reassure them. "We would only

destroy the ship without warning if it were to commence launching and deploying its strategic weapons without warning," he told the Terrans. "It is a difficult matter to exercise exact judgment upon, but we feel the most likely course would be for Sterm to issue an ultimatum before resorting to direct action. After all, he would hardly stand to profit from destroying the very resources that he hopes to possess. Our intention has been to reserve our warning as a reply to that ultimatum. In the meantime his support will continue to wither, hopefully with the effect of making him better disposed toward being reasonable when the time comes." Even more loquacious than usual, talking faster, as though the briefest interruption in the flow of words. "We've been having a serious discussion." Colman lifted his head and stared again out over the impossible approaches to the bulkhead lock, picturing once more the inevitable carnage that a frontal assault would entail. Who on either side would stand to gain anything that mattered to them? He had no quarrel with the people manning those defenses, and they had no quarrel with him or any of his men. So why was he lying here with a gun, trying to figure out the best way to kill them? Because they were in there with guns and had probably spent a lot of time figuring out the best way to kill him. None of them knew why they were doing it. It was simply that it had always been done. He smiled. "Lucky Micky." " ? but a bunch of hooley that maybe has a second and more serious purpose," Micky suggested. Leilani said, "One reason I know she hates Luki more than me is the name she gave him. She says she. Little snot, Jay thought to himself and turned the page. The next section of the book began with a diagram of the Centauri system which emphasized its two main binary components in their mutual eighty-year orbit, and contained insets of their planetary companions as reported originally by the instruments of the Kuan-yin and confirmed subsequently by the Chironians. Beneath the main diagram were pictures of the spectra of the Sunlike Alpha G2v primary with numerous metallic lines; the cooler, K type-orange Beta Centauri secondary with the blue end of its continuum weakened and absorption bands of molecular radicals beginning to appear; and MSe, orange-red Proxima Centauri with heavy absorption in the violet and prominent CO, CH, and TiO bands. revelation of a sense of worthlessness that the girl would deny but that from personal experience Micky studied her torso. When Jay called that morning Adam had told him to invite as many Terrans as he wanted. Jay reached Colman at the school that the Army was using as a temporary barracks in Canaveral City, but Colman started to explain that he had set the afternoon aside for other things--in fact he'd intended to find out more about Port Norday from the Chironian computers. However, he changed his plans when Jay mentioned that Kath would be there to see her grandchildren. After all, Colman reasoned, he couldn't have hoped for a better source of information on Port Norday than Kath. As Hanlon was off duty, Colman had invited him along too. Bernard sat forward, his expression suddenly serious. "No, I didn't," he said. "Is that what they've been doing to it? How did. " His voice trailed away silently. .might be used as a bowl. "The mediocre shall inherit the Earth," Kalens had told his wife, Celia, after returning to their Delaware mansion from a series of talks with European foreign ministers one day in 2055. "Or else, eventually, there will be another war." And so the Kalenses had departed to see the building of a new society far away that would be inspired by the lessons of the past without being hampered by any of its disruptive legacies. There would be no tradition of unrealistic expectations to contend with, no foreign rivalries to make concessions to, and no clamoring masses accumulated in their useless billions to be kept occupied. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that telescoped from the main body of the ship to terminate in cupolas mating with external ports in the Battle Module, two forward and two aft its midships section. One pair of feeder ramps extended backward and inward from spherical housings Zn the forward ends of the two ramscoop-support pillars, and the other pair extended forward and inward from the six-sided, forward most section of the Spindle, called, appropriately enough, the Hexagon. As if having to get through the feeder ramps wasn't problem enough, the transit tubes, freight handling conveyors, ammunition rails, and other lines running through to them from the Spindle all came together at a single, heavily protected lock to pass through an armored bulkhead inside the Hexagon. Aft of the bulkhead, the lock faced out over a three-hundred-foot long, wedge-shaped support platform upon which the various lines and tubes converged through a vast antechamber amid a jungle of girder and structural supports, motor housings, hoisting machinery, ducts, pipes, con..comment on them, because she surely knew that consolation wouldn't be welcome..had been, it continued to turn, to writhe, to flail at the air.
